CHEMTRONICS Technical Data Sheet

TDS # CMAQ

Chemask® Aqua

PRODUCT DESCRIPTION

Chemask[®] Aqua is a high temperature temporary spot mask that protects component-free areas from molten solder during wave soldering. It is water soluble, designed to be removed with open and closed loop aqueous cleaning systems. Chemask[®] Aqua is low foaming and has no effect on deionized water (DI) system resin beds. This water soluble formulation is stable to rosin, organic and inorganic fluxes.

- Protects boards from molten solder to 515°F (268°C)
- Prolongs deionized water system life
- Low foaming
- Compatible with most flux types
- Leaves no corrosive residue
- Does not contain Methanol
- Non-contaminating

TYPICAL APPLICATIONS

During wave soldering, Chemask® Aqua Solder Masking Agent protects:

- Component Free Areas
- Gold Connectors
- Gold Fingers
- Pin Connectors

TYPICAL PRODUCT DATA AND PHYSICAL PROPERTIES

| Base Material | Synthetic Resin |
|--|--------------------------|
| Color | Orange |
| Flux Compatibility | All types |
| Temperature Stability | 515°F (268°C) |
| Tack-Free Drying Time (10 mils @ 77°F) | 30 min. |
| Cure Time (10 mils @ 77°F) | 1 hour |
| Viscosity (@ 77°F) | 40,000 cps to 50,000 cps |
| Viscosity Adjusted With | Deionized water |
| Solids Content | ~ 40% |
| pH | 7.0 - 8.0 |
| Weight/Gallon | 9.1 lbs. |
| Shelflife | 1 year |

COMPATIBILITY

Chemask® Aqua Solder Masking Agent is generally compatible with most materials used in printed circuit board fabrication. As with any solder masking agent, compatibility with substrate must be determined on a non-critical area prior to use.

APPLICATION METHOD Squeeze Bottle/Syringe Yes Spatula Yes Screening Yes Stencil Yes Automatic Dispensing Yes

USAGE INSTRUCTIONS

For industrial use only.

When applying by hand using squeeze bottle, syringe or spatula, insure that all areas of the pre-tinned hole are evenly covered on the side to be soldered. For screening applications, properly clean and prepare screen, then apply masking agent in the same manner as solder paste. Automatic dispensing equipment may also be used as appropriate. Allow an hour to fully cure a application. 10 mil thick Thicker applications will require additional cure time. Rapid cure can be achieved in a 120°F oven.

REMOVAL: After allowing the mask to become fully cured, the mask may be washed away in an open or closed loop aqueous cleaning system with water temperature at a minimum 120°F under agitation. If using a recirculating system, install a minimum 10 micron bag filter before the resin beds.

Detergents may be used to increase cleaning efficiency.

AVAILABILITY

CMAQ8 8 oz. Liquid Squeeze Bottle CMAQ1 1 Gal. Liquid
